

GULFSTREAM G150 > D-CGEP

The G150® is quickly becoming a favorite in the mid-size market. With the longest range at the fastest speed, an advanced avionics suite, and the most comfortable cabin, the G150 provides the most value in its class.

Through the use of high thrust, fuel efficient Honeywell TFE731-40AR engines, combined with numerous aerodynamic improvements, the Gulfstream G150 is the fastest mid-sized business aircraft in the world today. The G150 started breaking speed records even before it went into service. A G150 test aircraft established a city-pair speed record on a flight from Tel Aviv to Geneva.

Turning to the cockpit, Gulfstream's avionics and research staff improved the Rockwell Collins ProLine 21 avionics system, adding some of the advanced technology inherent in the vaunted Gulfstream PlaneView® cockpit. The result was a fully integrated avionics system that enhances flight-crew performance and improves the overall level of flight safety.

CABIN AMENITIES

- Full refreshment center
- Microwave
- Satellite Phone
- CD/DVD Player
- Flightshow

PERFORMANCE

Maximum Range	5,400 km
Speed	870 km/h
Altitude max.	13,716 m

SPECIFICATIONS

Normal Seating	7
Cabin Width	1.75 m
Cabin Height	1.75 m
Cabin Length	5.38 m
Baggage Volume	2.27 m ³

VIEW
