

CESSNA CJ2 > D-IAMO, D-ISCO

The revolutionary CitationJet changed the face of business aviation forever. For the first time, operators could benefit from a jet that delivered a level of efficiency formerly associated with turboprops. Now, the Citation CJ2 delivers a value package outshining the classic that spawned it.

The passenger area of the CJ2 is nearly 3 feet longer than the CJ's. There's plenty of room for passengers to relax in a sumptuous six-seat center-club configuration. Amid the clean lines, rich materials and impeccable design, you can enjoy the atmosphere – and size – of a cabin rivaling that of a far more costly aircraft. There's even a large tail-cone baggage compartment to hold luggage and gear.

CABIN AMENITIES
