

> D-CGEP

Since the start of production in 2005, the **Gulfstream G150** has quickly established itself as customer's favorite among the midsize jets. Its predecessor Gulfstream G100 was leading in speed and range, but couldn't provide the comfort expected from a mid-cabin business jet. Accordingly, the cabin was enlarged by 71%, measuring 17,70 ft in length and 5,74 ft in width as well as height, and is now welcoming up to seven passengers to enjoy air travel in its spacious, elegant ambience. Adding the continental range of 3355 mi and a top speed of 547 mph, the G150 provides guests a truly great performance.

The layout of the D-CGEP comprises four seats in a central club configuration with large pull out tables and one single seat as well as a side-facing divan in the forward cabin. Light and modern leather furniture create a friendly atmosphere and the Bose cabin entertainment system with dual independent DVD player ensures optimal fun above the clouds.

The galley has a cabinet with ice drawer as well as a microwave oven and incorporates surface for catering arrangements. A fully enclosing, hard pocket door divides the aft lavatory from the main cabin, ensuring the necessary privacy on board.

CABIN AMENITIES
