

> D-CWWP

Elegant and convenient - The **Embraer Phenom 300** is a very popular light jet and was developed jointly by BMW and Design Works. With a capacity of eight passengers and a cabin volume of approx. 12 m³, it offers more space than its competitors from Hawker and Cessna. Covering a comparably wide range of 2268 mi, this business jet connects most European cities non-stop.

The layout of the D-CWWP comprises four seats in a central club configuration with a pull out table between each club section, two aft cabin forward facing seats and a comfortable divan next to the galley. The Full Refreshment Center includes a cabinet with ice drawer as well as storage and offers surface for exclusive catering arrangements.

A fully enclosing, hard pocket door divides the aft lavatory from the main cabin, ensuring the necessary privacy on board. The D-CWWP is an elegant means of travel for both business and pleasure, convincing with high flexibility and efficiency.
